PROFESSIONAL SUMMARY

I am a Bachelor of Commerce in Data Science and Informatics graduate with skills in data analysis, web design and development, and programming languages including Python and PHP. I possess knowledge in database management, networking and troubleshooting. As a Freelance Web Developer, I have a proven track record in developing and deploying responsive websites, managing servers, and producing innovative digital solutions that meet client requirements. Skilled in research, ICT support, and website redesign, I seek opportunities to apply my technical skills in dynamic environments while delivering high-quality web solutions. I am committed to continuous learning, innovation, and leveraging technology to create efficient, user-focused systems that support business growth and operational excellence.

WORK EXPERIENCE

Parirenyatwa Group of Hospitals (PGH)

ICT Assistant - Student training, attachment:

2023 - 2024

- Monitored network performance and resolved connectivity issues to maintain seamless operations.
- Performed routine maintenance on servers, desktops and IT hardware.
- Monitored and troubleshooted changes and anomalies during end-of-day processes.
- Supported user account management, including creation, permissions allocation and password resets.
- Reviewed backup and restoration operations done on TRIMED.
- Trained 50+ non-technical users on security best practice and software tools, reducing helpdesk by 20%.
- Collaborated with IT support staff to troubleshoot hardware/software problems across departments.

TECHNICAL SKILLS

- Web development
- Python and PHP programming languages
- Database Management
- Git Version Control
- System and Network Administration
- ICT security

KEY ATTRIBUTES

- Agile & Adaptable
- Quick to learn
- Self-Driven and Proactive
- Effective Communication
- Attention to detail
- Problem-solving
- Team Collaboration
- Innovative

EDUCATION HISTORY

Bachelor of Commerce: Data Science and Informatics

Institution: Midlands State University

Sept 2021 – June 2025

Degree Class: 2.1

CERTIFICATIONS AND LEARNING PATHS

IBM Data Science Professional Certificate

PROJECTS

1. Final Year Project: Toll Optimisation using IoT for ZINARA

The project focused on creating a functional system capable of detecting vehicle number plates, retrieving vehicle information, processing toll charges automatically and collecting data in real time for analysis.

2. Psychometric Test System

Is a web-based application designed to administer, manage and evaluate psychometric assessments online using PHP, while MySQL stores user details, test questions, responses, scores and results.

3. Nicbel Private Limited Spare Parts Website

Developed and deployed a responsive web application for a motor spare parts company to support online business operations and customer engagement using PHP, HTML, CSS, RESTful APIs and Web Hosting.
